*Quality Answers.*

## A Company Dedicated to the Fine Art of Service.

*When Production Stamping opened its doors back in 1984, the original business objectives still hold true to present day...provide a unique service to every customer that is noticeable, valued and trustworthy.*

Still family-owned and operated, Production Stamping has grown to become one of the most well-respected metal fabricating companies in America, providing our time-tested and sought-after service-set to a demanding global market.

Here, the aspects surrounding "service" have been fine-tuned. Every customer must sense that their projects are exceedingly important, and our professionals at Production Stamping have a vested interest in making certain that every outcome is a combined success.

In 2007, we adopted the company tagline, "Quality Answers". This is what truly separates Production Stamping from any competitor, large or small.

Here, you will get real, truthful and quality answers. The professionals at Production Stamping do not guess. If there is research to accomplish or testing to be completed, we do it, only then can we provide the educated answers every customer deserves. In other words, the solution to your requirements, concerns or challenging problems will always be met with an outcome of quality, guaranteed.

## The Truth about Precision & Metal Fabrication.

We look at our work as an art form. In doing so, our product offering takes on a certain "personal touch". Yes, here you will find all the state-of-the-art equipment real professionals require to create incredible parts made from a wide variety of metals, all housed in a modern, clean facility. But the truth in what we do and how we do it, can only be found in the expertise of our dedicated staff and the heightened awareness that here, the customer reigns supreme.

### What We Believe . . .

#### **We believe in the power of communication.**

Every Production Stamping customer knows they can count on us for real-time updates and production details of any project from start to finish.

#### **We believe in respecting deadlines.**

Our production planning efforts and capabilities exist to satisfy every customer requirement. At Production Stamping, we understand that a customer's deadline is often their lifeline, as well. Deadlines are meant to be met.

#### **We believe in providing our customers real value.**

In today's manufacturing world, the word "value" has become diluted. Here, value can be found by taking advantage of a true, full-service offering. Production Stamping stands for professional **engineering** and **part design**, **precision tooling**, **machining** and **fabricating**, **rapid prototyping**, **state-of-the-art stamping**, **masterful finishing techniques**, **complete assembly** and available **JIT** and **Kanban inventory structures** with **full distribution and shipping capabilities**.

## Dedicated to Providing Quality Part Production.

Throughout the production process, our state-of-the-art **Inspection Department** uses sophisticated and precise methodology making certain that each step within each process is effective, reliable and precise. We believe in the power of actual, dedicated inspection. Tight tolerances and a continuing need for certain precision, commands that we perform for our customers like no other. We welcome these challenges. Such awareness and logical practice, tends to heighten our reputation and simply makes us a preferred performance-based company... and our customers know it.

### This is Production Stamping.

***Unmatched service.***

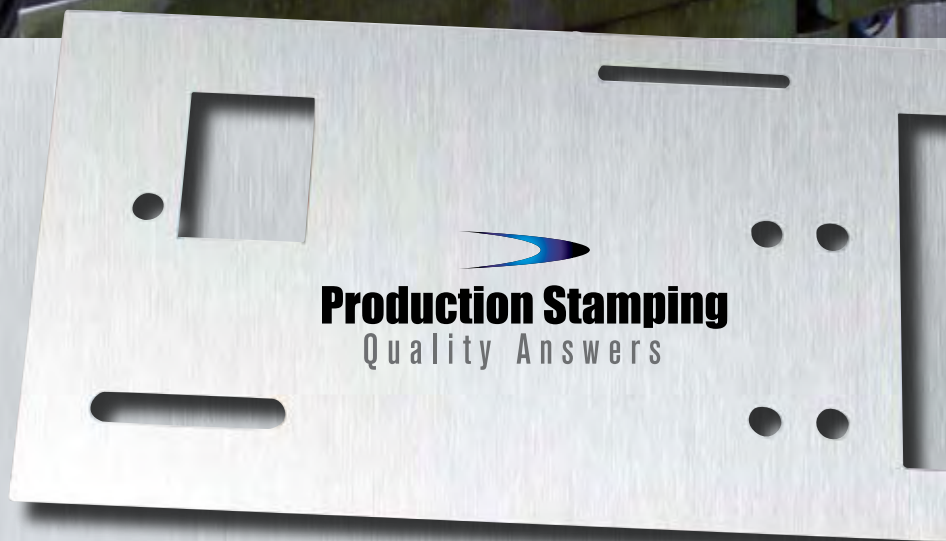

***Professional expertise.***
